Welcome to Prestige Cabins, the only choice when it comes to manufactured relocatable homes. Prestige Cabins specialises in all aspects of manufactured, relocatable homes for residential, rural or commercial situations; starting with the consultation, the design and through to bringing your inspiration to life, we cover all possibilities from residential/rural blocks to holiday parks.

We will create a design that is unique to your property.

Prestige Cabins have placed homes all along the East Coast of Australia, including Ensuite/Amenities blocks, granny flats through to full sized residential homes and commercial buildings.

Our chassis design used on all our plans is a full "Super Gal" chassis with an epoxy rust protection coating. This includes full steel joists which add to the strength and durability of the entire unit. Frames can be of either Termite Treated Pine or Steel.

The staff at Prestige Cabins bring you over 30 years of experience which gives you the assurance that you're dealing with a company that has the reputation and commitment to deliver you an exceptional product that will endure Australian conditions with low maintenance using quality products in every single home.

Prestige Cabins is located on the North Coast of NSW in Coffs Harbour. Our homes are all built at our factory and are delivered to your site.

We have a range of plans, or you may have your own design, and we are extremely flexible and happy to work with you to accomplish your goal.
